At googlefonts there are fonts that look like the fonts used by Alex...for example the navigation bar we could use this one: https://www.google.com/fonts#QuickUsePlace:guickUse/Family:Montserrat

#### Fernando Mancilla

haha oooh ok I see @chrisbautista....I got it

Mar 26 at 10:18 PM (edited) - Reply - Delete

#### **Chris Bautista**

Dont forget to add the comments. Just make fake ones. It doensnt need to be working.

Mar 26 at 10:14 PM - Edit - Delete

#### Fernando Mancilla

**@chrisbautista** I couldn't see the project at invision due to it is asking me about permissions....yeah Chris I'm starting to build the blog now forgetting the comments 👍

Mar 26 at 10:13 PM - Reply - Delete

## **Chris Bautista**

**@fernandomancilla1** hi fernando. Regarding the comments for the blog. Just fake it out for now. Just build fake comment divs below the post. That would be enough

Mar 26 at 10:11 PM (edited) - Edit - Delete

## Fernando Mancilla

Yeah how can we solve it? maybe @alexkuo8 has to use googlefonts?

Mar 26 at 10:10 PM - Reply - Delete

### **Chris Bautista**

I dont have the font name to install Need those to make webfonts

Mar 26 at 10:08 PM - Edit - Delete

#### Fernando Mancilla

**@chrisbautista** you can see the fonts opening the file in photoshop and clicking the text, but I don't how we gonna put those fonts in our web:)

Mar 26 at 10:07 PM - Reply - Delete

#### **Chris Bautista**

**@Alex** great job on invision. Can you also build out the menu for the other menus. Check the sitemap file on github

#### **Chris Bautista**

@alexkuo8 Hi alex what;s your font?

Mar 26 at 9:51 PM - Edit - Delete

## Fernando Mancilla

@alexkuo8 I asked you yesterday about the comments of the users in the BlogPage, cause I don't know if is possible that they can do this in tumblr...

Hey @chrisbautista @fernandomancilla1 I just created a Invision page, check this out.

https://projects.invisionapp.com/d/main#/console/6813007/146076211/preview

I'm still messing around with the app. So sorry if it has some mistake.

@alexkuo8 @fernandomancilla1 awesome job guys. I'll share the project site in a while

Mar 26 at 9:10 AM - Edit - Delete

#### **Chris Bautista**

Hi @alexkuo8 have you explored invisionapp?

Mar 26 at 9:09 AM (edited) - Edit - Delete

#### **Chris Bautista**

**@fernandomancilla1** is the intro page in trello?

Mar 26 at 9:08 AM - Edit - Delete

#### **Chris Bautista**

@fernandomancilla1 lets just leave the comments for now. Thats a feature that can be enabled elsewhere whats important is to make the blog work.

Mar 26 at 9:08 AM - Edit - Delete

## Fernando Mancilla

Ok **@chrisbautista** I will do the tumblr...but I have a question, can the blog format have comments of the users? cause I don't know if we can put some comments of our users in tumblr...

The intro page is done!!

# Home | Lessons | Project | Account **WELCOME TO COMP 1950** It's January 2016, and HTML/CSS/JS are the front-end stack that makes up all web development. Current versions of each are generally well accepted, Mobile makes up around half of all web browsing, Microsoft has made a half decent browser and front-end web development is a solid job on it's own! In COMP 1950, we're going to take a look at that front-end stack, how you can make those three technologies work together to make great things. During the first half of the course, we will take a hard look at HTML and CSS and where we are now as web developers. We will move on to template development (the primary task in web development these days) and mix in some JS later on. This page will contain news or updates from time to time, so stay tuned **NEW STUDENT OLD STUDENT**

Hi @alexkuo8 I think the lecture page would be more article like than a time line. I believe users should be able to read it better on a white backgrouund.

Mar 25 at 5:31 AM - Edit - Delete

#### **Chris Bautista**

@alexkuo8 were you able to do the invisionapp thing? if not it's OK. Just make a paragraph or two telling why you liked your choices on the design. thanks

#### **Chris Bautista**

Good job!

@fernandomancilla1 Can you host the blog on tumblr? Build out the template from @alexkuo8 's PSD?
